April 22, 1985

Docket No. 50-320

Mr. F. R. Standerfer
Vice President/Director
Three Mile Island Unit 2
GPU Nuclear Corporation
P.O. Box 480
Middletown, PA 17057

Dear Mr. Standerfer:

Subject: Three Mile Island Nuclear Power Plant Unit 2
Operating License No. DPR-73
Docket No. 50-320
Auxiliary Hoist Load Test

The staff has reviewed your letter dated April 18, 1985, which discusses
the results of the load test of the Reactor Building Polar Crane's
Auxiliary Hoist. We have noted that you generated a Material
Non-Conformance Report (MNC-1) based on your use of a load cell rated at
100,000 pounds ± 1% for the test instead of a cell rated at 100,000
pounds ± .5% as specified in the NRC's Safety Analysis Report dated

An April 5, 1985 letter from Whiting Corporation (Attachment 6 of your submittal) concurred with your use of the auxiliary hoist during the load test for a weight up to 67,500 pounds. Therefore, as you have stated, since the load test indicated weight was 65,000 pounds, the maximum load that could have been on the hook was 66,000 pounds. This value is well within the
Whiting approved limits. We have also noted an additional unlike kind
replacement in the weight type limit switch and concur with that action.

Therefore, based on our review of the subject letter and Attachments 1
to 6, we concur with your use of the Auxiliary Hoist.

Sincerely,

Original signed by
B. J. Snyder
