Three Mile Island Nuclear Station, Unit 2
Operating License No. DPR-73
Docket No. 50-320
Discontinuation of the TMI-2 Restart Punchlist

REFERENCE: Met-Ed/GPU letter LL2-81-0223, G. K. Hovey to Dr. B. J. Snyder, dated September 24, 1981.

Dear Sir:

In the reference letter, GPU committed to create and maintain a file of generic letters which would be reviewed for applicability and required action if a decision were made to refurbish TMI-2. With this in mind, a "restart punchlist" was created and has been expanded over the ensuing years to include NRC Bulletins, I & E Notices, and any other germane issues. However, GPU Nuclear has publicly acknowledged that TMI-2 will not be refurbished as a nuclear power generation facility. Instead, TMI-2 will be kept in a monitored storage condition until the license expiration date of TMI-1. At that time, TMI-1 and TMI-2 will be decommissioned simultaneously. There being no need to maintain a TMI-2 Restart Punchlist, it's use will be discontinued.

Sincerely,

R. L. Long
Director, Corporate Services/TMI-2
