 Middletown, Pennsylvania
 Docket Number 50-320

Subject: AMBULANCE LEAVES SITE

At approximately 9:30 A.M. a construction worker, experiencing chest pains, left the site in an ambulance. Initial diagnosis by the licensee's doctor on site was a possible coronary attack.

The individual was not in a controlled area (radiological) at the time of this event. It appears the individual reported to work this morning not feeling well.

Media interest is expected because the licensee has notified local off site agencies of the event. Neither the licensee or NRC is planning a press release.
