

NOTIFICATION OF EVENT OR UNUSUAL OCCURRENCE--PNO-TMI-84-08

This preliminary notification constitutes EARLY notice of events of POSSIBLE safety or public interest significance. The information is as initially received without verification or evaluation and is basically all that is known by NRC staff on this date.

Facility: GPU Nuclear Corporation  
Three Mile Island, Unit 2  
Docket Number 50-320

Licensee Emergency Classification:  
X Not Applicable

Subject: REACTOR VESSEL HEAD LIFT

Today, July 24, 1984, the licensee is anticipating lifting the Unit 2 reactor vessel closure head. The lift is scheduled for about 11:00 AM ESDT. The lift is being monitored at a control station located on the "D" ring inside containment. The lifting activities are also being monitored using closed circuit television at the Command Center and Conference Room located adjacent to the Control Room and at the Control Room. Other remote monitoring stations have been established in the Public Information Office of the Unit 2 Administration Building and the Media Center, Crawford Station, Middletown, PA. The Three Mile Island Program Office (TMIPO) is supplying NRC coverage at all the monitoring locations and has backup personnel available. The TMIPO is prepared to offer 24 hour/day coverage until the reactor vessel head is placed on the storage stand and the modified indexing fixture is in place on the reactor vessel and filled.

Media interest occurred because of public sensitivity to TMI related events. The Commonwealth of Pennsylvania was informed.

This preliminary notification is issued for information only and the NRC plans to continue monitoring events as they occur.
