

NOTIFICATION OF EVENT OR UNUSUAL OCCURRENCE--PNO-TMI-84-08B

This preliminary notification constitutes EARLY notice of events of POSSIBLE safety or public interest significance. The information is as initially received without verification or evaluation and is basically all that is known by NRC staff on this date.

Facility: GPU Nuclear Corporation
Three Mile Island, Unit 2
Docket Number 50-320

Licensee Emergency Classification:
X Not Applicable

Subject: REACTOR VESSEL HEAD LIFT - UPDATE

At about 12:10 PM on July 24, 1984, the reactor vessel closure head was set down on the storage stand. The placement was accomplished by use of a pry bar and winch attached to the containment wall to edge the reactor vessel head into place. Once the operation began the effort took about 15 minutes.

The TMIPO is supplying NRC 24 hour/day coverage until the modified indexing fixture is in place on the reactor vessel and filled with reactor coolant water, which is the next sequential evolution.

Media interest occurred because of public sensitivity to TMI related events. The Commonwealth of Pennsylvania was informed.

This information is current as of 12:15 PM on July 25, 1984.

This preliminary notification is issued for information only and the NRC plans to continue monitoring events as they occur.
