D. Ross
T. Murley

FROM: Roger Mattson

Per our discussions of 4/7 p.m., the following procedure should be followed to assure coordination of National Lab support for NRC activities at TMI-2.

- a) Either NRR in Bethesda or NRR site operations can originate a work request of a lab. In either case, the work request will be coordinated with the following people:
Bethesda: Aycock or Miraglia
TMI-2: Vbarrondo or Bixby
- b) Bixby will maintain a log of all active and completed lab inputs, circulating updated copies every three days.
- c) Bixby will keep Murley informed of new work requests for necessary contract follow-up.

The first clean copy of the Bixby log is attached.

SUMMARY OF NATIONAL LABORATORY
SUPPORT WORK FOR THREE MILE ISLAND

TO: D. Ross,
FROM: W.W. ^WBixby/L.J. Ybarrondo ^{LM}
DATE: Revision one, April 7, 1979

After our meeting with you and Roger Mattson, on April 7, Willis and I updated the National Laboratory Support Work for Three Mile Island summary, incorporating all of your comments.

In particular, we called Berlinger of NRC and Tony Buhl, and have the new core melt calculations that your requested under way.
