Attn: Dr. B. J. Snyder
Program Director
US Nuclear Regulatory Commission
Washington, DC 20555

Dear Dr. Snyder:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
Annual Update of System Descriptions and
Technical Evaluation Reports

Pursuant to your letters dated July 20, 1981, and February 4, 1982, GPUNC is required to annually update Recovery System Descriptions and Technical Evaluation Reports. Presently, the EPICOR II and Solid Waste Staging Facility System Descriptions are being updated and will be transmitted to your staff within a year of the previous submittal date. GPUNC has reviewed the following System Descriptions and Technical Evaluation Reports and has determined that no revision is required at this time:

- Standby Reactor Coolant Pressure (SPC) System Description
- Mini-Decay Heat Removal (MDHR) System Description
- Interim Solid Waste Staging Facility (ISWSF) Technical Evaluation Report

Additionally, the Fuel Pool Waste Storage (Tank Farm) System is not being updated. Due to the Fuel Pool "A" Refurbishment project, the Tank Farm is presently not being utilized for storage capability and will eventually be removed and dismantled. Upon completion of the Tank Farm removal,
