For: The Commissioners

From: Harold R. Denton, Director
Office of Nuclear Reactor Regulation

Thru: Executive Director of Operations

Subject: ORDER FOR MODIFICATION OF LICENSE FOR THE THREE MILE ISLAND NUCLEAR STATION, UNIT 2

Purpose: To inform the Commission of the planned issuance of an Order for Modification of License.

Discussion: As you know, on July 20, 1979, the staff issued an Order suspending the authority provided by Facility Operating License No. DPR-73 to operate Three Mile Island Nuclear Station. In that Order we stated that a Safety Evaluation was being prepared which would address the imposition of new and/or revised Technical Specifications setting appropriate license conditions to assure the continued maintenance of the current safe, stable, long-term cooling condition of the facility. Enclosed is a copy of the revised Technical Specifications, the supporting Safety Evaluation, and the Order which we intend to issue to incorporate the revised Technical Specifications.

The staff intends to issue the Order and amend the license incorporating the attached Technical Specifications on September 19, 1979. Please contact us if you have any questions.
