

NOV 22 1985

Docket No. 50-320

GPU Nuclear Corporation
ATTN: Mr. F. Standerfer
Vice President/Director, TMI-2
P. O. Box 480
Middletown, Pennsylvania 17057

Gentlemen:

Subject: ANNUAL REVIEW OF THREE MILE ISLAND NUCLEAR STATION UNIT 2 RECOVERY
QUALITY ASSURANCE PLAN (1000-PLN-7200.02 REVISION 4-00)

Reference: Your letter 4410-85-L-0176 dated October 14, 1985 to
Dr. Thomas E. Murley, Region I, Regional Administrator, USNRC

We have received your referenced letter that transmitted Revision 4-00 to the
subject Recovery Quality Assurance Plan. This Revision contained 101 changes
principally brought about by organizational changes and program clarifications.

One major change was to increase the certification intervals for Level III NDE
Examiners and Level III NDE personnel from three years to five years. This was
identified in Appendix C, as a clarification for the compliance to Regulatory
Guide 1.58, Revision 1, September 1980. This change is consistent with the
ASME Code Cases N-341 and N-356. The NRC acceptance of these code cases for
TMI-2 use was granted in a letter dated January 16, 1985, from Mr. John F.
Stolz to you.

Region I staff has reviewed the changes and found them acceptable as they did
not reduce the NRC accepted commitments in your Recovery Quality Assurance Plan.

The effectiveness of your QA Program will continue to be the subject of routine
regional inspections. If you have any questions on the above please contact
R. W. Winters on 215-337-5244.

Sincerely,

Original Signed By
Leo H. Bottonhausen
